

PRESS RELEASE

Newly re-launched ICE Virtual Library becomes the largest online civil engineering resource in the world

18th June 2009

The Institution of Civil Engineers and Thomas Telford Ltd. are pleased to announce the forthcoming launch of their new and expanded ICE Virtual Library.

From July 2009, all journal and book content back to 1836 will be hosted on the new ICE Virtual Library platform at www.icevirtuallibrary.com. The ICE Virtual Library will include everything from current journal content to new ebooks, from the archives of the ICE Proceedings to the complete backfiles for *Geotechnique* and *Magazine of Concrete Research*, and all ICE society titles.

The ICE Virtual Library promises a host of new benefits to end-users, including:

- **Online-only subscriptions** - save space and access online wherever you are
- **New range of ebooks** - providing revolutionary new ways of accessing ICE's knowledge, including chapter purchasing
- **Archives from 1836** - enhance your paper or project with much-improved access to the ICE archives
- **Ahead-of-Print publication** - all our titles will be published electronically ahead of the print edition, ensuring you get new papers as quickly as possible
- **Saved searches and social bookmarking** - save time and effort by bookmarking our content, creating saved searches and setting up email table of contents and RSS feeds
- **Intuitive interface** - get straight to the content you need with our powerful searching and browsing tools
- **Improved recommendations** - 'Most Popular Articles' listings, as well as targeted recommendations, ensure you discover content relevant to your needs

Please contact sales@burgundyservices.com for more information, to obtain free trial access or to take advantage of a range of special offers.

About the Institution of Civil Engineers (ICE) (www.ice.org.uk)

The Institution of Civil Engineers is the world's longest established professional engineering body. The institution and their Thomas Telford Journals imprint publishes authoritative journals and conference proceedings that feature new research and practical case studies from across a broad range of civil engineering disciplines. Their titles are available on an annually renewable subscription basis either individually or gathered together in a range of both broad or subject specific collections
