

Burgundy Information Services distributes exclusive mini-collections from Future Science Group

Burgundy Information Services is pleased to announce that it is now exclusively distributing eight new mini-collections on behalf of Future Science Group throughout Europe. These collections cover key clinical areas and enable librarians to purchase more focused mini collections of journals from both the Expert Reviews and Future Medicine series.

As a leading provider of products and services for the medical, scientific and business communities, Future Science Group save customers time and money by presenting the most important scientific breakthroughs in an accessible and evaluated format, while at the same time providing the scientific community with unique vehicles for disseminating forward-thinking research information and data.

The Expert Review series of journals deliver systematic, authoritative analysis and insightful commentary from international experts. Having recently expanded the range of biomedical review journals, Expert Reviews now provides the clinical community with a unique source of high-quality, authoritative reviews on best clinical practice across a broad range of disciplines.

Future Medicine's rigorous peer-review process ensures that published information is trusted on a daily basis by many thousands of clinicians, researchers and healthcare professionals from all over the world. As one of the leading, emerging independent publishers Future Medicine is at the forefront of novel research technologies and clinical advances.

Mini-collections include:

- Oncology (5 titles)
- Cardiology and Vascular Medicine (6 titles)
- Infectious Disease and Vaccines (5 titles)
- Pharmacogenomics, Biomarkers and Personalized Medicine (5 titles)
- Neurology and Regenerative Medicine (7 titles)
- Women's Health (2 titles)
- Biotechnology (8 titles)
- Immunotherapy (8 titles)

About Future Science Group

Future Science Group Ltd, based in London has developed an innovative publishing portfolio to reflect post-genomic medicine. Through its imprints, Expert-Reviews, Future Medicine, and Future Science, the Future Science Group provides healthcare practitioners and research professionals with a unique source of objective, cutting-edge information on exciting trends emerging in the light of these advances.
